

danış yapı

Danış Yapı Madencilik Sanayi ve Ticaret A.Ş.

ABOUT US

Daniş Yapı, which has been providing services to the sector since 1996, is one of the leading companies in its region with its successful history and is acting with the vision of becoming a leader in the service sector. Our company is active in the fields of mining, construction, transportation, ready-mixed concrete, and asphalt production.

As a requirement of a developing and growing understanding, it accordingly improved and restructured aggregate and asphalt production facilities, construction equipment, and transport vehicles park. We are working with an expert, strong and dynamic staff consisting of technical staff and more than 750 personnel. Many projects have been completed with the road construction technique and engineering perspective acquired in more than 25 years. Daniş Yapı aims to increase its value not only in its sector, but also on the scale of Turkey. In particular, it sets out a vision of becoming a leader in the construction industry

Its mission is to adopt a management style that is human-oriented and focuses on efficiency. This approach is developing not only with economic achievements but also with the awareness of corporate citizenship, which the whole society does and will benefit from. Again, with this awareness, it implements various corporate social responsibility projects focusing on the fields of education, environment, culture, art and sports. It always offers its services based on the principles of customer satisfaction and trust. As a result, creating reputable brands in several sectors and the synergy it has with large groups in mining, construction and ready-mixed concrete also makes a very important contribution to this process. As a product of all these accumulations and collaborations, it has the desire to be among the pioneers of change in Turkey by adapting rapidly to sector-based developments.

In today's world, institutions as well as individuals have important responsibilities for improving the welfare level of society and contributing to the sustainable economical, social and environmental development. By working in awareness of its corporate responsibilities, it aims to add value by spreading this perspective to business models and the business environment. In addition to its direct contribution to economic development, it also makes significant contributions to employment. In all sectors in which it operates, it takes into account the expectations of its business partners when carrying out its operations and tries to meet the expectations at the highest level with the understanding of mutual dialogue and feedback mechanisms. Acting with the awareness that climate change and increasingly depleted resources threaten our world, our company constantly reviews and renews all forms of business to minimize its negative environmental effects.

Considering energy efficiency, water, and waste management as one of the priority environmental areas, our company also strives to increase awareness in the environmental and social field with its business partners as a responsible company.

As a company, we continue our way without stepping back from our awareness of achieving all the goals we have set. It continues its path with determination in accordance with the missions and visions in accordance with the goals and strategies on issues such as workplace health and safety and environmental health.

With its "Human First" understanding, it operates with the "0" working accident goal.
